PROFESSIONAL SUMMARY

Results-driven AI & Data Science undergraduate (CGPA: 9.55/10) with hands-on experience building ML-powered Android applications, NLP pipelines, and data-driven web dashboards. Proficient in Python, machine learning, and full-stack development with a strong mathematical foundation. Seeking a full-time role in AI, Data Science, or Software Engineering to deliver impactful, production-ready solutions.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Rajagiri School of Engineering & Technology (Autonomous), Kerala

Class XII — CBSE | St. Antony's Public School, Kanjirapally

Class X — CBSE | DAV Public School, New Panvel

CGPA: 9.55 / 10

2023 – Present

91.8% | 2023

95.8% | 2021

WORK EXPERIENCE

Database Engineering Intern — JusDB Technologies Pvt. Ltd.

June 2025

- Designed and implemented relational databases in MySQL 8.0 on Linux; authored DDL/DML scripts for production-ready table structures.
- Configured user roles, privileges, and ACID-compliant transaction workflows, improving data integrity across multi-user environments.
- Performed database backup and recovery using mysqldump; optimised query performance via indexing and window functions.

PROJECTS

PennyWise — Intelligent Expense Tracker (Android) | Kotlin, NLP, Naive Bayes, Room, Android SDK

- Problem: Manual expense logging is time consuming and error-prone; users miss tracking financial SMS notifications.
- Built a hybrid NLP pipeline combining regex-based extraction, merchant name normalisation, and a custom Multinomial Naive Bayes classifier to auto-categorise bank SMS transactions with 91% classification accuracy on labelled SMS dataset.
- Integrated Room database with aggregation queries to surface daily/monthly spending trends, category breakdowns, and top-merchant analytics in real time.

STUDYTracker — Intelligent Study Planner (Android + Web) | Kotlin, Jetpack Compose, Firebase, Chart.js, JavaScript

- Problem: Static STUDY preparation planners fail to adapt to individual productivity patterns and burnout cycles.
- Implemented a regression-based model (LWLR) to estimate task completion times by modelling time-of-day patterns, fatigue factors, and historical performance — achieving adaptive schedule updates unique to each user.
- Built a real-time web dashboard with Chart.js showing live task-delay ticking, cumulative drift analysis, and model R^2 confidence metrics; mirrored core ML functionality in an Android app using Jetpack Compose, Room, and Hilt (Clean Architecture / MVVM).

Portfolio Website | HTML, CSS, JavaScript, Tailwind CSS, GitHub Pages

- Developed a fully responsive personal portfolio featuring a dynamic project gallery, live weather widget (OpenWeather API), Dev.to article RSS feed, and an animated contact form with client-side validation.

PDF Manager Toolkit | Python, Tkinter, PyPDF2

- Built a desktop GUI application enabling users to merge, split, extract, and clean PDF files; implemented directory-selection dialogs and page-range controls, reducing manual PDF processing time significantly.

TECHNICAL SKILLS

Languages: Python, Kotlin, Java (OOP), C, R, SQL / PL-SQL, HTML, CSS, JavaScript

AI / ML: Machine Learning, NLP (NLTK, SpaCy), Feature Engineering, Naive Bayes, LWLR

Libraries & Frameworks: NumPy, Pandas, scikit-learn, SciPy, Matplotlib, Jetpack Compose, Room, Hilt, Tailwind CSS, Chart.js

Databases & Tools: MySQL 8.0, Firebase (Firestore / Auth), OracleDB, VS Code, Jupyter Notebook, Weka, Git, GitHub

Mathematics: Probability & Statistics, Linear Algebra, Calculus & Optimisation, Data Mining

CERTIFICATIONS

- NPTEL — Introduction to Programming in C (Silver Elite, 75%) | Programming in Java (72%) | Probability Theory & Stochastic Processes (Silver Elite, 85%)
- Swayam — Programming in Python (Score: 99/100, 12-week course)
- Infosys — Java Essentials (Dec 2024) | Fundamentals of NLP with NLTK & SpaCy (Dec 2025)
- Kaggle Micro-certifications — Python, Pandas

ACHIEVEMENTS & ACTIVITIES

- Secured S Grade (highest) in all Mathematics courses from Semester 1 through 5.
- Resource Person — delivered Origami-Based Mathematics Workshop under Mathematics Department (2025).
- Resource Person — delivered Origami-Based Workshop under IEEE RSET WIE Affinity Group (2026).
- Participant — Techy Showdown, Abhiyanthriki'23 National-Level Tech Fest; Volunteer — Over-Clocked Event (2025).

LANGUAGES

English (Fluent) | Hindi (Fluent) | Malayalam (Native)
